3.01 Storyboarding a Scene Exercise: Colorful Painters

Directions: Create a storyboard for the scenario below, focusing on using the appropriate shot sizes. Include brief pieces of script in the lines below.

Storyboard Scenario **–** There are two painters working on a house, each painting one side of the house. The first man is painting the front of the house, and the second man is painting the rear of the house. The first painter has trouble with a beehive in the corner of the house, stuck in the eaves. After running up and down the ladder several times to avoid being stung, he continues painting. The second painter spills a gallon of paint on the prize rose bush beside the house, and to cover his tracks, digs up the bush and tosses it aside. The first painter paints very quickly and covers the windows in paint, while the second painter balances his paint cans sloppily on his ladder. At the end, they each come around the corner to meet the paint - only to discover that each painter was painting with different colors!
