

4.01 Troubleshooting Tips

Web page does not display	<ol style="list-style-type: none">1. Check that file is saved as .html and not as a .txt file2. Check the top line of code3. Look for missing brackets < >
Updated content does not display	<ol style="list-style-type: none">1. Make sure file was saved before previewing.2. Make sure the editing file and the browser file are the same file (check file path)3. HTML files are read left to right and top to bottom so look at the source code preceding the content that does not display properly.
Image does not display	<ol style="list-style-type: none">1. Students frequently key in rather than 2. Check path. The image needs to be an absolute path including http or a relative path referring to the folder in which the image is saved.3. Check file extension of image and make sure the source code refers to the same extension.4. Double-click on image to make sure it is a valid image file.
HTML tags appear when previewing in Web browser	<ol style="list-style-type: none">1. Look for missing brackets < >
Hyperlink does not work properly	<ol style="list-style-type: none">1. Copy and paste links rather than keying them in to the source code2. Students often key in <a herf> rather than <a href>3. Missing closing tag
Problems with heading 1	Make sure students use h1 not hl—meaning a number one and not letter l
Problems with lists	Check if student used u1 (number) rather than ul (letter)
Styles do not display	Make sure curly brackets were used—not parentheses
Proper colors do not display	Check spelling of color names; Make sure hex codes are preceded by # symbol
Images display too large or too small	Images will display in their native size unless CSS or size attributes are used.
